

**COMMERCIAL  
GROWERS OF  
WISCONSIN**

# *Membership Meeting*

## **WHEN?:**

Thursday, January 29<sup>th</sup> 2026. **Meeting starts at 5:30pm.** Come early at 5pm for a behind the scenes tour!

## **WHERE?:**

CGW Member **Karthauser & Sons** will be hosting and will provide some light snacks and beverages. They are located at **W147N11100 Fond du Lac Ave, Germantown, WI 53022**

## **TOPIC?:**

### **Healthier Plants, Fewer Headaches: Practical Alternatives for Modern Plant Protection**

Pest pressure, residue buildup, water quality challenges, and repeated applications are ongoing realities in commercial greenhouse and nursery operations. In this educational presentation, **Laura Denk of Environmental Plant Management (EPM)** introduces a different approach to plant protection—one rooted in **enzymatic technology and natural chemistry**, not harsh or toxic chemicals.

Laura will explain how plant cleanliness, irrigation system hygiene, and consistent protocols can reduce pest pressure and support healthier, more resilient plants. The presentation will walk through the science behind EPM's technology, how it works in real-world growing environments, and how growers are integrating these tools alongside existing programs to simplify maintenance and improve consistency.

This presentation is practical, educational, and designed to spark new ways of thinking about plant care—without disrupting what's already working.

Product samples will be available for attendees to trial in their own operations.
